Versatility

Organizers are designed to hold Personal Protection Equipment (PPE) to protect healthcare providers. With quick access to PPE including gloves, face masks, and gowns, these Protection Organizers make it easy to meet compliance

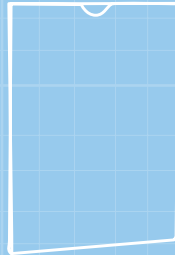

requirements. Protection Organizers can be easily customized. For example, adding a single or a double glove dispenser, caddy, sign holder, or door hanger ensures you have what you need when you need it. See back page for more details.

Convenience

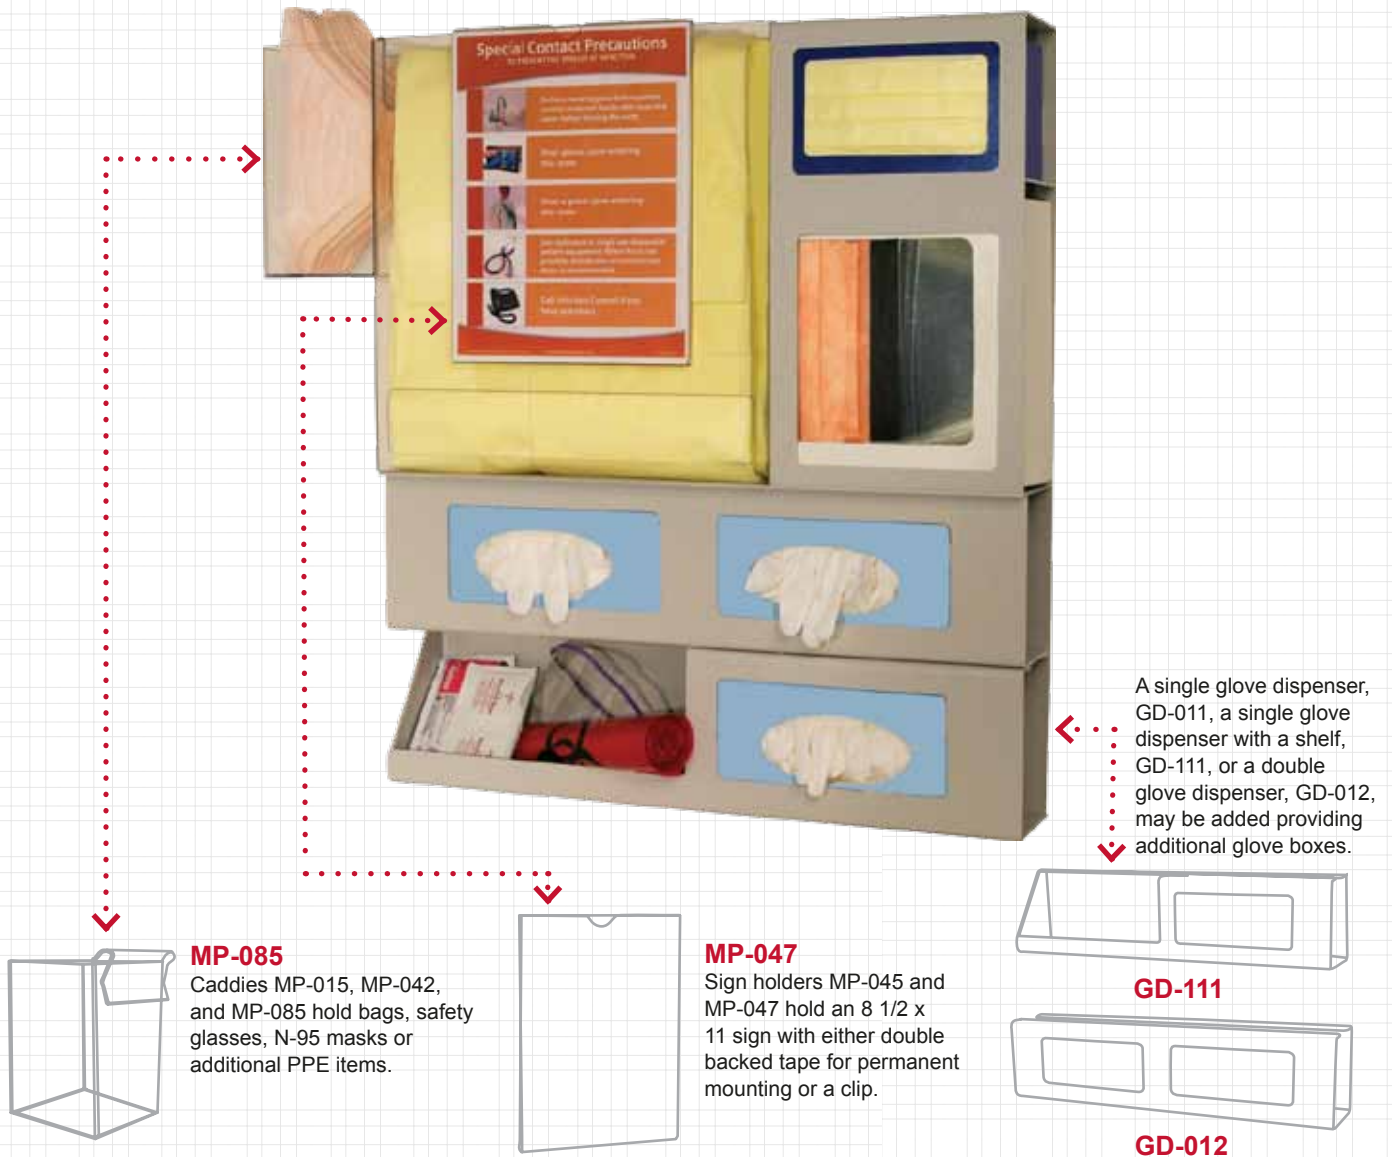

Protection Organizers provide a convenient option for standardizing the location of PPE supplies. Organizers can be mounted in high traffic, visible locations outside patient rooms, hung on walls or

patient doors. Generally mounted at eye level, outside patient's rooms, they allow the right combination of PPE to be available at all times. The soft new look of the quartz color makes them attractive in any setting.
